

Guidelines for the use of Histopathology Core services

Rangos Research Building Histopathology Core Lab

3537 Rangos Research Center

Director: Dr. Sunder Sims-Lucas (sunder.sims-lucas@chp.edu)

Manager: Daniel Bushnell (daniel.bushnell@chp.edu)

Histologist: Michele Mulkeen (michele.mulkeen3@chp.edu)

The Rangos Histopathology Core lab is a research-based lab located in the Rangos Research Center in 3537. Our goal is to provide quality histology in a timely manner to researchers in need of histology services. We offer routine as well as specialized services and will do our best to accommodate your requirements. Please contact us to discuss your research needs.

The Histology Core provides the following services:

- Routine tissue processing
- H&E staining
- Unstained blank slides
- Special stains
- Immunoperoxidase staining (antibody provided by researcher)
- Antibody work up (antibody provided by researcher)

Fee Structure:

Rates for all services are available by email (michele.mulkeen3@chp.edu)

Consultation:

To ensure the highest quality of work and that work is done to the satisfaction of each investigator a consultation with the core director is required prior to starting each project. In addition to this the histologist will work with the investigators to ensure technical aspects of the project are optimized.

Work requests:

All work requests must have a completed Work Request and Disclosure Form. Investigator Disclosure is a means to ensure occupational safety for all staff, and to comply with federal and university guidelines on responsible conduct of research.
